

Document of conformity

The methodology of the software tool

"SHIPZERO"

Version 1.1

for the calculation of corporate carbon footprints and emissions arising from transport chain operations,
developed by the organisation

shipzero GmbH

at the location St. Annenufer 2, 20457 Hamburg with the status of 15.11.2024 was verified in
accordance with the requirements of the standards:

GHG Protocol -
Corporate Accounting and Reporting Standard

March 2004 issue

ISO 14083:2023-03

March 2023 issue

The calculation tool fulfills all relevant requirements that are placed on the balancing system and acquisition of greenhouse gas-relevant information for the calculation of a complete corporate carbon footprint and emissions arising from transport chain operations in accordance with the above-mentioned standards.

The emission factors used for the calculation were taken from published information or credible sources. The methodology was checked for suitability and plausibility.

The calculation of the specific corporate carbon footprints and emissions arising from transport chain operations and the correct application of the methodology underlies the responsibility of the above-mentioned organisation.

The verification was performed according to the requirements of ISO 14064-3:2020-05.

Basis of the document is the test report with the no. C-24-25436-Tool.

Berlin, 10.01.2025
