Corporate Carbon Footprint Report

FY 2023

Foreword

Our company was founded on the premise of supporting climate-intensive industries in their transition to a sustainable and resilient economy. As a result, environmental awareness is deeply embedded in our corporate culture.

The emissions data platform shipzero enables data-driven reporting and reduction management for logistics companies. We provide convenient solutions and actionable information to reduce emissions from global freight transport.

The aim of this report is to strengthen our commitment to sustainability by using data to improve transparency and proactively manage environmental impact as our team continues to grow.

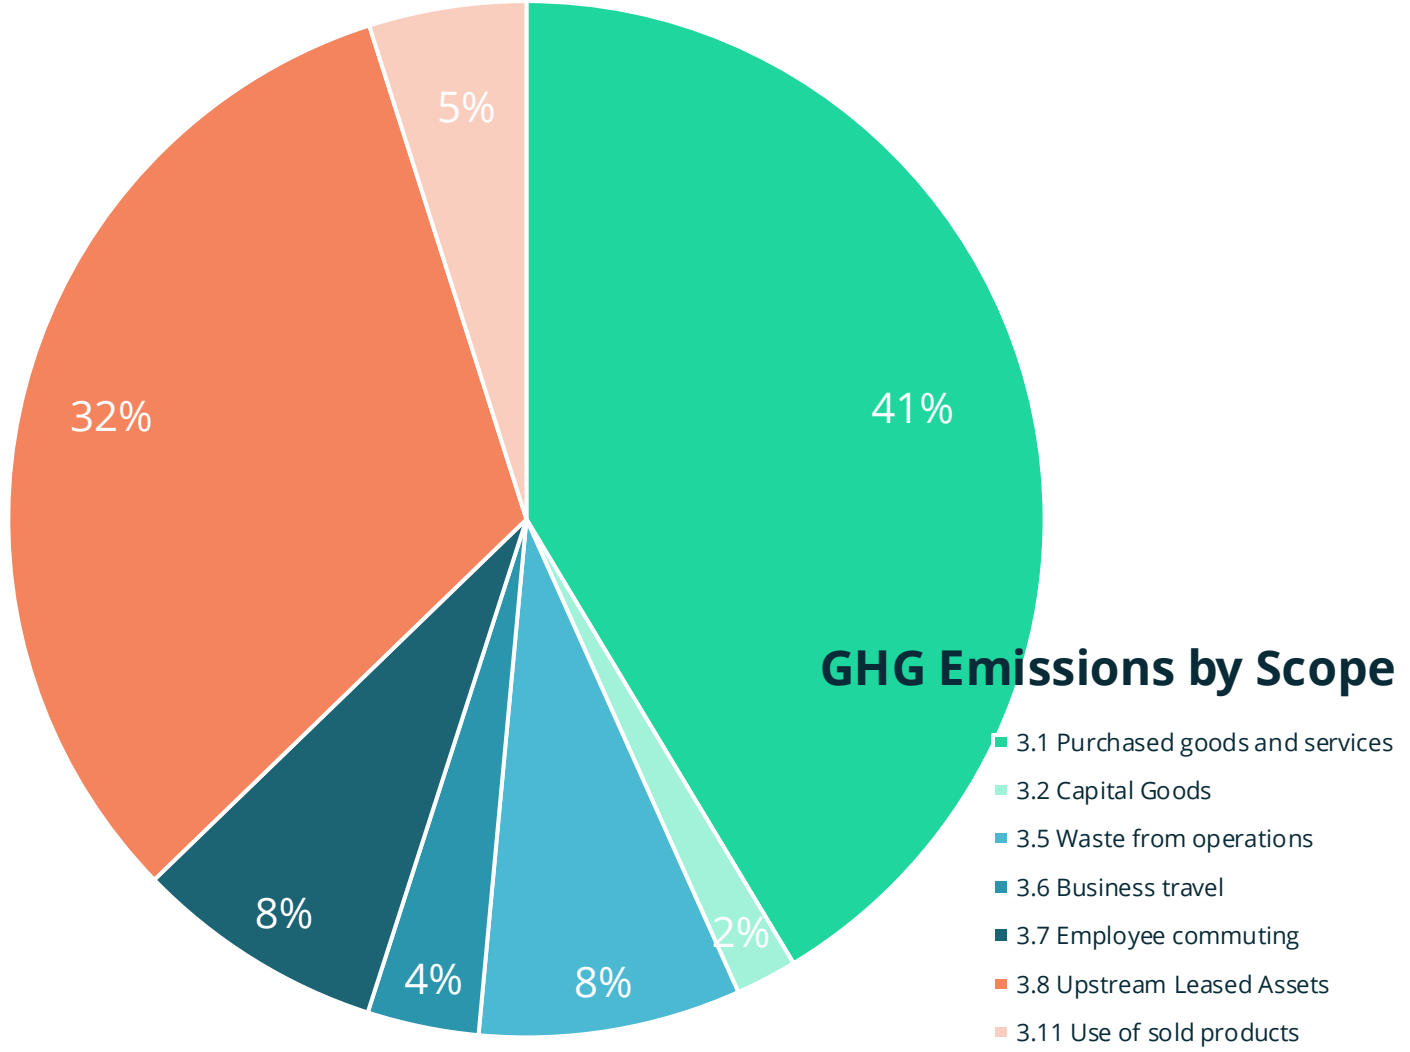

Summary

▶ Total Carbon Footprint in 2023
69,9 tonnes CO₂e

▶ Carbon Footprint per employee
2,8 tonnes CO₂e

▶ Carbon Footprint per employee compared to the base year
-22%

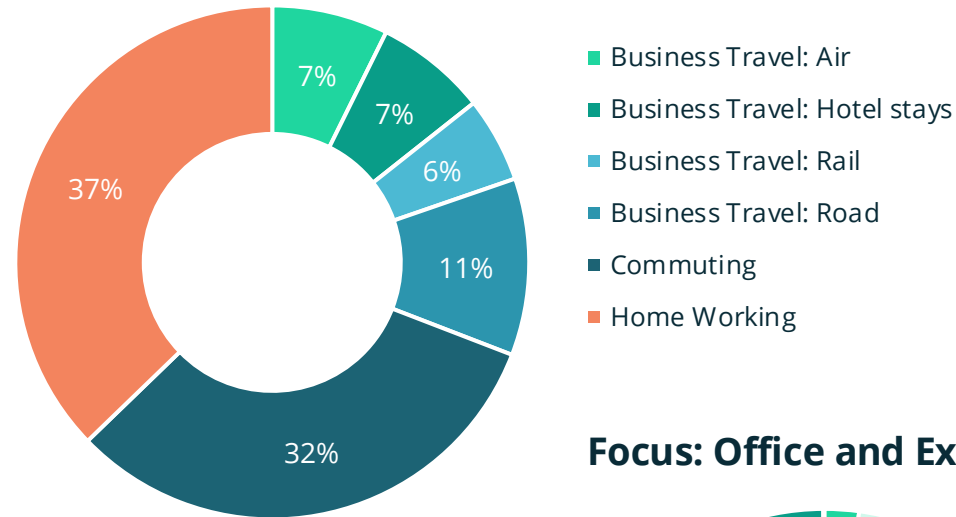

Analysis

Looking into our carbon footprint

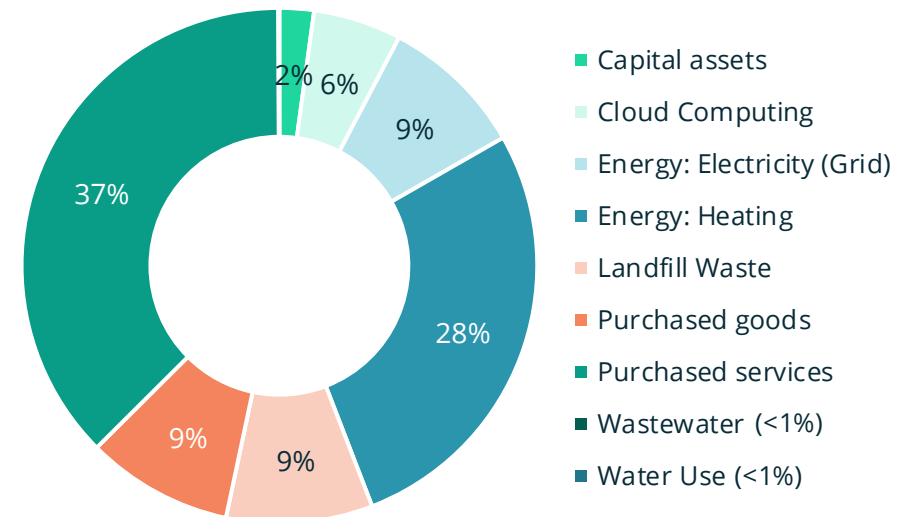

As a service-based organization, our emissions fall mainly in Scope 3 indirect emissions. We have used the best supplier data to hand to make our emissions calculations.

We include the use of cloud servers for our platform used by our customers, which make up almost 5% of our overall footprint. We recognize that this will grow over time and are seeking green solutions to cloud computing.

Focus: Travel and Commuting

Focus: Office and Expenses

Year-on-year Comparison

Carbon emissions increased by 39% from 2022 to 2023 due to organizational growth.

However, per employee our emissions reduced by 22% and our customer numbers also increased almost three-fold in that period.

shipzero is doing more with less and we plan to continue this trend.

Comparison to Base Year

Our Good Practice in Sustainability

Measuring our impact through our work

Our positive impact extends beyond our own sustainability efforts, by working to decarbonize logistics and the supply chain..

Being thought leaders in sustainability

We work with companies, industry bodies and standard-setters to ensure that we are at the forefront of best practice.

Practicing what we stand for

We are careful with our resources, and mindful of our impact, at work and elsewhere. From green electricity in our offices, vegetarian- and vegan-only drinks and snacks, travel cards for all employees and minimizing the use of single-use items, shipzero involves everyone in its sustainability goals.

Passion and enthusiasm of our team

shipzero brings together people who are passionate about our future and are driven to be part of the solution for a better tomorrow.

Understanding this report

About this report

Company Name	shipzero GmbH
Sector	Software Provider
Reporting Period	01.01.2023 to 31.12.2023
Reporting Standard	GHG Protocol Corporate Standard
Reporting Boundary	No facilities or operations have been excluded from this inventory
Consolidation Approach	Operational Control Approach
Emissions Factor Sources	Defra 2023, EXIOBASE 3.8.2, IEA 2023, EU Buildings Factsheet 2016
Significant Reporting Changes	None
Data Quality Score	Some estimates and extrapolations have been made to ensure completeness
